SELF-CARE CORNER BY ELLIE FARRIBA

Pause and reflect on the incredible work that you've accomplished and the impact you have made on your students' lives. Remember to show yourself some loving kindness amid all the challenges and busyness of the month. Today, show some self-compassion and self-care.

Reflect and Appreciate: Take a few moments to reflect on the positive experiences you have had this month. Acknowledge the effort and dedication you put in every day. Allow yourself to enjoy the satisfaction of making a difference.

Pamper Yourself: Treat yourself to something that you enjoy and that brings you joy. Prioritize any activity that rejuvenates your spirit: go for a walk, take a bubble bath, get a massage or a facial, play pickleball...whatever you love to do, just do it! Remember, taking care of yourself is NOT SELFISH but NECESSARY for your WELL-BEING.

Practice Mindfulness: Find moments of stillness and engage in mindfulness exercises. Close your eyes, breathe deeply in and out, and focus on being present. Embrace the calmness that comes with being fully present and allow yourself just "to be".

Connect with Others: Reach out to a fellow teacher who understands the unique challenges you face as an educator. Grab a coffee, exchange ideas, or simply have a meaningful conversation. Connecting with others who empathize with your journey can provide a sense of support and validation.

Remember, you are doing an incredible job as an educator, and your well-being matters. Close out the month with some loving kindness toward yourself. By doing so, you are replenishing your energy and resilience, which will ultimately benefit you and your students.

Castles and Calculus? They go together in Mrs. Mercer's class with Minecraft Education Edition.

Minecraft design by A. Huang

Chef Parmesan is a chef famous for her famous Parmigiano-Reggiano production sold worldwide. However, she has a secret. The secret is that she had the world's biggest and tallest cheese wheel ever made. All right below her secret underground vault under her mansion. Every week, Chef Parmesan would check on her gigantic cheese wheel. One day, the cheese looked different to her. To make sure, she calculates the surface area of the cheese. After three weeks, she found out the radius of the cheese's right circular cylinder was increasing at a rate of 4 cm per second, but the surface area had yet to change. Well, it's a good thing Chef Parmesan knows how to do Calculus! She notes that the original radius of the cheese was 10 cm, then which means the height is also changing. So, it's a mystery. At what rate did the cheese height change and who is the culprit?
